Liquidity and Leverage Ratios

31 March 2024

#### AL SALAM BANK B.S.C. Net Stable Funding Ratio (NSFR) Disclosure 31 March 2024

## Background:

Al Salam Bank ("ASB") has been subjected to the Basel III NSFR standards from December 2019, pursuant to CBB circular No. EDBS/KH/54/2018 dated 16th August 2018. ASB is required to maintain NSFR of at least 100% on an on-going basis.

The objective of NSFR is to improve the resiliency of banks by promoting long term funding stability. NSFR is designed to limit the risks emanating from excessive maturity mismatches over the medium to long term. More specifically, the NSFR requires ASB to fund illiquid assets with a minimum amount of stable liabilities over a horizon of one year.

The NSFR requires banks to maintain a stable funding profile in relation to the composition of their assets and offbalance sheet activities. CBB circular stipulates the applicable Required Stable Funding ("RSF") factor for each category of asset and Available Stable Funding ("ASF") factor for each type of funding source.

ASB seeks to ensure that its NSFR remains above the specified regulatory minimum requirements. This is achieved by:

(i) Monitoring the NSFR closely against an established internal early warning trigger and management target.

(ii) Managing and developing strategies to build a diversified funding base with access to funding sources across retail and wholesale channels.

#### Analysis and main drivers:

Al Salam Bank strategy is to maintain stable and well-diversified funding sources by focusing on raising more stable free float and long-term deposits from core customer base in Bahrain and across other key GCC markets where strong banking relationships have been successfully established. The main driver of this strategy is to fund bank's core business activities with the widest deposit base and hence maintaining comfortable funding mix for the long-term assets and subsequently healthy NSFR.

The Assets and Labilities Committee (ALCO) regularly reviews the different liquidity indicators -including the NSFRand set appropriate action plans in maintaining adequate, sustainable and healthy liquidity position. ALCO review takes global economic indicators as well as local micro economic factors into consideration. Hence effective liquidity management is set into practice steered by treasury and risk department and collaborated with other key business units.

As at 31 March 2024, the weighted value of the Available Stable Funding (ASF) stood at BD 3.2 billion, while the total weighted value of the Required Stable Funding (RSF) stood at BD 2.7 billion. The resultant NSFR stood at 118.75%, well above the current 100% threshold stipulated by CBB. The ASF is primarily driven by a strong capital base, substantial retail and private banking deposit base and deposits from non-financial corporate customers.

Post application of the relevant factors, the contribution of regulatory capital, retail deposits and deposits from nonfinancial corporates stood at 14%, 61% and 14% respectively. The bank does not rely on financial market funding sources and interbank funding activities are primarily used for short term funding gaps.

The RSF post application of relevant factors is driven by financing provided to non-financial corporate customers, retail and small business customers, and some unlisted investments.

ASB's High-Quality Liquid Assets (HQLA) requires minimum funding due to its sovereign nature and high liquidity which, after applying the relevant factors, makes up 1% of the RSF portfolio. unencumbered financing and placements account for 66% and Investment exposures account for 16% of the RSF.

At ASB, there is considerable focus on growing and maintaining stability of demand and term deposits provided by private, corporate and retail customers which will continue to form a significant part of the funding.

AL SALAM BANK B.S.C. Net Stable Funding Ratio (NSFR) Report - Consolidated 31 March 2024

### AL SALAM BANK B.S.C.

Liquidity Coverage Ratio (LCR) Report - Consolidated 31 March 2024

CBB issued its regulations on Liquidity Risk Management in August 2018. The regulations mandate that banks are required to maintain LCR of at least 100% on a daily basis. The objective of LCR is to manage assets and liabilities to create strong short-term resilience and sufficient liquidity that is enough to fund cash outflow for 30 days.

Below is the bank's average consolidated LCR for the period:

| Image: series of the | Below is the bank's average consolidated LCR for the period. | Q1-2                | Q1-2024           |                     | Q4-2023                    |  |

\*Represents simple average of daily LCR

CBB in June 2018 issued guidelines on leverage ratio as part of updates to the Capital Adequacy Module. The ratio measures how well the banks' Tier 1 capital covers its total exposures (self-financed exposures and adjusted exposures funded by EOIA) both on-balance sheet and off-balance sheet. CBB has mandated a minimum consolidated leverage ratio of 3%.

| S.No. | Description   | BHD '000  |  |
|-------|---|-----------|--|
| 1     | Total Self Financed Assets  | 2,241,693 |  |
| 2     | 2 Total URIA Financed Assets  |           |  |
| 3     | Off Balance Sheet items - with relevant Credit Conversion Factors   | 305,417   |  |
| 4     | 4 Leverage ratio exposure [(1) + (2)*30% + (3)]                     |           |  |
| 5     | Regulatory Adjustments  | 49,407    |  |
| 6     | Total exposures for the calculation of the leverage ratio [(4)-(5)] | 3,388,306 |  |
| 7     | Tier 1 Capital  | 333,878   |  |
|       | Leverage Ratio [(7)/(6)]  | 9.85%     |  |
|       | Minimum Leverage Ratio as required by CBB                           | 3%        |  |

Below is the bank's consolidated financial leverage ratio as at 31 March 2024:
